

INNOVATIVE HEALTHCARE LIGHTING

Because Hospital Lighting
Should Be *Hospitable*

SOOTHING, PATIENT-FRIENDLY SPACES WITH EFFICIENT & EFFECTIVE LED & FLUORESCENT LIGHTING

Cove Lighting creates comfortable, indirect illumination without the glare and sterile feel of standard commercial down lights. ELP offers a variety of fixtures for different size cove covers with the CL Series, CLLP Series and CLM Series. Additionally, the CLC Series provides a complete cove lighting system which includes the decorative cove.

CLC Series

CLM Series

Indirect Lighting fills corridors with volumes of light. Our shallow metal wall wash fixtures, the AK and MP Series, fit in a standard stud wall (even with 1 hour fire rating!). Even less obtrusive, our unique “cast” GRG products like the HITW Series (Hole In The Wall) become part of the wall when installed and look like a custom-built light niche.

Floor Wash and Night Lighting safely lights your way. Shallow AK, HITW, Mini and the new miniature, LS Series can recess into a standard wall (even with 1 hour fire rating!)

LS Series Trimless

LS Series with Trim & Amber Lens

HITW Series

Medi-Conferencing and Distance Learning lighting with VTTB Series video conference fixtures provides a clear, flattering broadcast image of participants.

HITW Series

Wall Wash Lighting with over a dozen styles of specialty, Wall Wash fixtures provide the perfect wash of light for any situation. "One size" does not fit all, when lighting Lobbies, Corridors, Murals and Display Walls.

HITW Series

AKTB Series

Hospital Options for ELP fixtures:

Anti-Microbial Paint = add -MB
Inhibits the growth of bacteria.

MRI Lighting = add -MRI
A few Incandescent/Halogen models of the HITW Series may be ordered as MRI-safe luminaires.

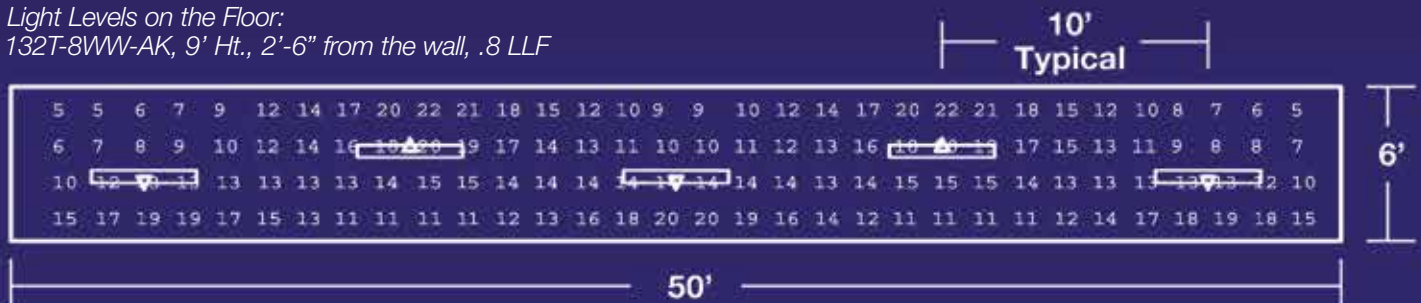

Hospital Grade Option = add -HG
Features Full Face Lens Plate, gasketed and anti-microbial paint.

Full Face Lens Plate = add -FFLP
Provides a more streamlined look for a full lens fixture.

Recessed and Surface Mount Wall Wash Fixtures from ELP:

A6 & A9 Series; AK, AKTB & AKS Series; AWW, AWWTB & AWS Series; DW; DWTB & DWS Series; IW, IWTB & IWS Series; Maxi, Maxi-TB & Maxi-S Series; Mini Series; MP, MPTB & MPS Series; SC & SY Series

EXTERIOR SPACES LOW WATTAGE – HIGH PERFORMANCE

Very shallow recessed and surface mount fixtures allow easy incorporation into structures and walls. All LEDs are supplied standard with -20° drivers while fluorescents are standard with -30° ballasts.

Specifically designed for LED, the new miniature LS-EX & LS-EXS Series fixtures are only 3" deep and provide a powerful punch of light.

LS-EXS Series

LS-EX Series

CP Series

CP Series

The CP & WLS Series have a shallow 4" depth and are available in both LED and fluorescent.

Note: CP & WLS Series fixtures project less than 2% of fixture lumens higher than 90 degrees from nadir (straight down) and in Zones LZ2 thru LZ4 can contribute to:

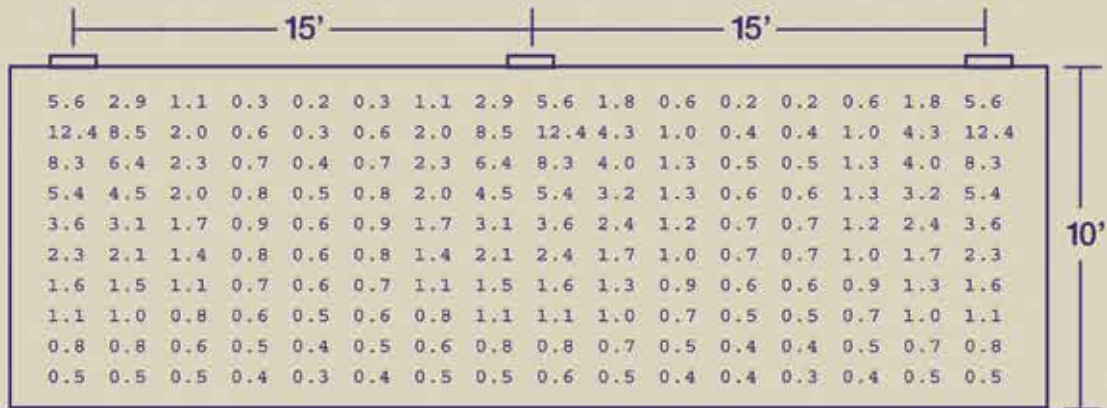

LEED Sustainable Site Credit 8: Light Pollution Reduction – 1 point

WLS Series

Exterior, Wet Location Fixtures: (Recessed and Surface Mount)

Imagine, lighting 320 sq. ft. to over 1.8 F.C. average with only (3) 13 watt fixtures!
