

# INSTALLATION INSTRUCTIONS

## DLTB SERIES T-Bar Mounting

Down Lights can be used alone or mix and matched with our AAMTB Series Adjustable Accent Lights or our DWTB or MPTB Series Wall Washers.

FOR SUPPLY CONNECTIONS ENTERING THIS FIXTURE USE WIRE SUITABLE FOR AT LEAST 90° C

**\* INSTALLATION TO BE DONE IN ACCORDANCE WITH NEC AND APPLICABLE CODES \***

1. Remove the "Lift & Shift" lens that sits on the edge of the housing by tilting it up at an angle to maneuver it out of the face of fixture.

2. Remove the Reflector by removing the screws, for access to the ballast.

3. The flanges along the length of the fixture may either sit on the T-Bar or support a ceiling tile.

4. For most installations secure fixture to T-Bar (typical as shown). To correct fixture height, adjust the mounting brackets with the screws inside the fixture.

5. For end to end installations with the step-end fixture for T-8 lamp, Hanger/Joiner brackets are required at the butting ends. Hang the fixture at the correct height then secure. (5 in row MAX.)

6. Fixtures may be mixed and matched with our AAMTB Series Adjustable Accent Lights or our DWTB or MPTB Series Wall Washers.

7. Attach the conduit to the K.O.s in the cover plate and make with connections. **Note: the DLTB Series fixtures have a reversing cover plate that will allow you to make connections from the side or the back of the housing.**

**REPLACING THE LENS SHOULD BE THE LAST STEP AFTER ALL FINISH WORK IS DONE.**
