DWTB SERIES

RECESSED Display Wall Washer
For T-Bar Lay-in

SYSTEM

Narrow, recessed compact fluorescent wall washer for suspended ceiling installations where a lay-in fixture is desired. Specifically designed for close placement to the wall (less than 2"). The formed aluminum reflector provides even unscalped illumination with no glare and offers exceptional lamp shielding. UL/CUL Damp Location Listed.

U.S. Patent #5,142,459

SPECIFICATIONS

Narrow, recessed, lay-in fluorescent wall washer for use with Biax, T-5 and T-8 lamps, for T-Bar ceiling installations. May be mounted end to end within the grid. Fixture is 5" deep with ballast(s) mounted within housing. Strong vertical throw of light allows the fixture to be placed closer to the wall than a typical wall wash unit. The one piece, formed reflector is high purity aluminum (99.9%) with 95% reflectance. It is easily removable without tools for access to the ballast and wiring. Reflector design provides complete lamp shielding even when viewed directly beneath fixture.

TGIC polyester powder coated housing is made of 22 gauge CRS with cover and knock-outs that provide quick wire access to side or back of fixture for through wiring.

OPTIONS

Ballast	120 HPF Electronic (Standard) 277 HPF Electronic Dimming (Some models) -DM Emergency (Some models) -EPP Magnetic -MG
